CyberImmersions Solutions in collaboration with Cyber Research & Innovation Society (CRIS) & (ISC)^2 Delhi Chapter is delighted to launch their next conference on
"The Blockchain Technology - A Revolution to Transform Society"

The blockchain, a decentralized technology or distributed ledger on which transactions are anonymously recorded has initiated a new revolution.

In addition to its use for cryptocurrencies and related potential misuse by cyber criminals, it's is going to change the society the way we transact business, manage assets, to the way we store our documents, vote, use our machines, and even prove who we are. It will transform companies, governments and the society at large.

Join us in the exciting discussion with the blockchain experts on this! Key topics for the conference include:

1. Blockchain Fundamentals
2. Blockchain - Is it secure? What are the challenges?
3. Blockchain - Legal and privacy issues
4. Blockchain applications to transform the society
5. Cryptocurrencies – How they work?
6. Cryptocurrencies and cyber-crimes – the road ahead

The conference is planned on **May 12th from 9:30 am to 4:30 pm in India International Centre, 40, Max Mueller Marg, New Delhi, 110003**. Attendees will be provided a certificate for their active participation by Cyber Research & Innovation Society (CRIS).
